# Task 1 – Website Audit & Documentation (Hostinger).

## This audit report covers the following sections:

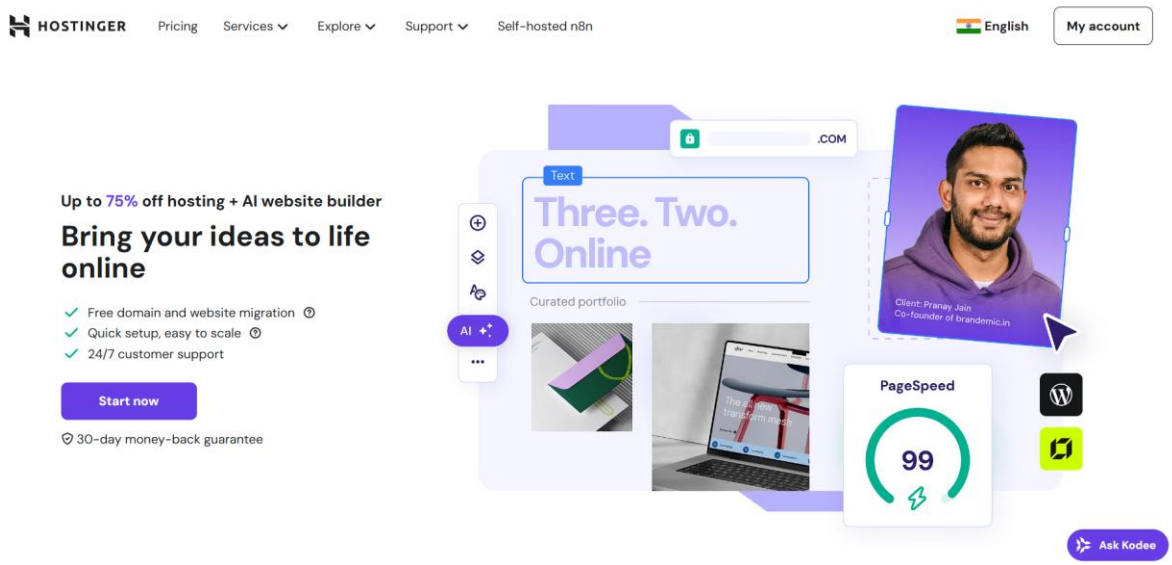
1. Website Overview
2. Design Issues
3. Performance Issues
4. SEO Issues
5. Optional Security Check

## (1) Website Overview :

- **Website Name:** Hostinger
- **URL:** https://www.hostinger.com/in
- **Purpose:** Provides affordable web hosting, domain registration, cloud hosting, VPS hosting, and an AI-powered website builder.
- **Target Audience:** Small businesses, startups, students, and individuals who want to build and host websites.

# (2) Design Issues :

## 1. Homepage

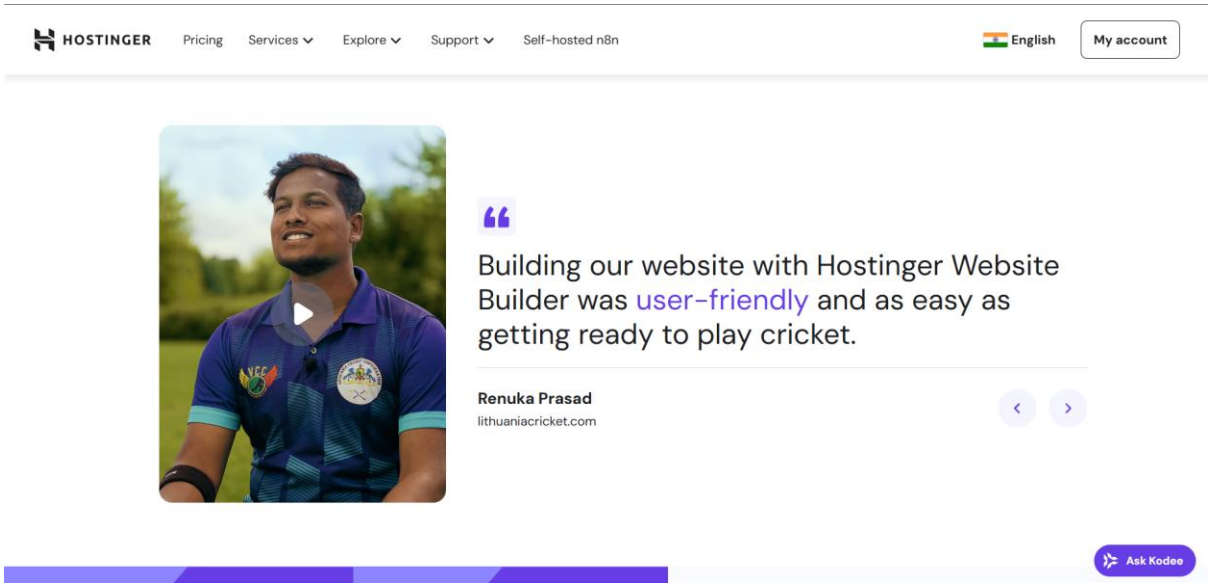


**Observation :**
The hero section highlights the main offer: "Up to 75% off hosting + AI website builder". It contains multiple images/icons along with text and CTA buttons, making it visually attractive.

**Problem:**
Having many images can slightly affect page loading speed and distract attention from the main message.

**Suggestion:**
Optimize images by compressing or using modern formats like WebP. Keep balance between visuals and key inform

## 2. Testimonials Section

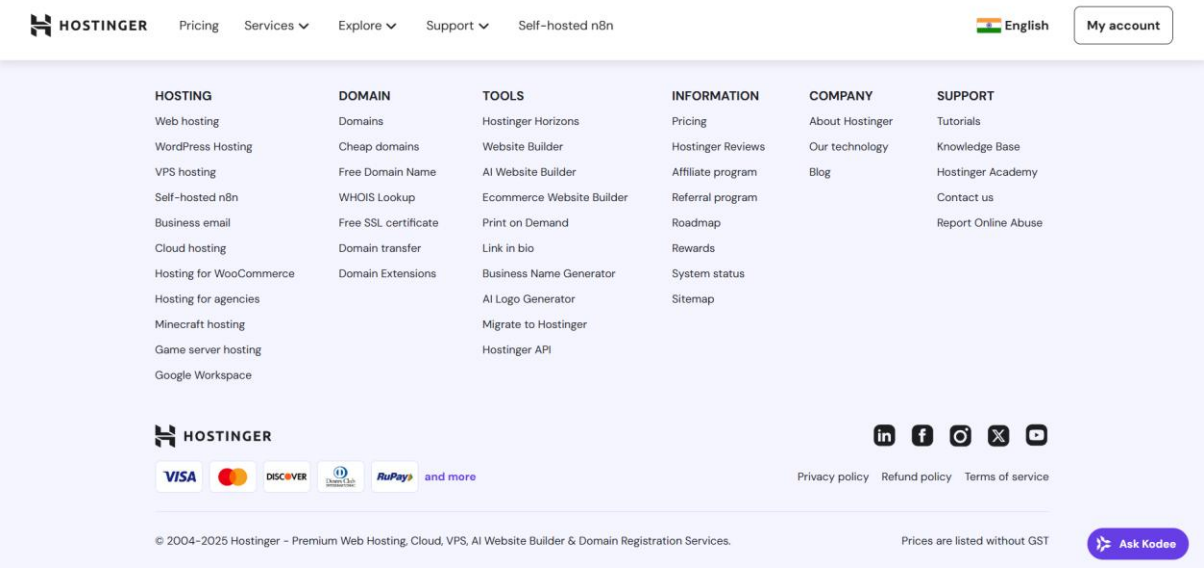


**Observation:**
The reviews section displays customer feedback along with user pictures. The design is visually appealing and helps build trust.

**Problem:**
User images are very large, which takes up extra space and may push text down or make the section appear cluttered on desktop.

**Suggestion:**
Resize user images to a smaller, consistent size. Maintain balance between images and text so that reviews are easy to read without overwhelming the layout.

## 3. Footer Section

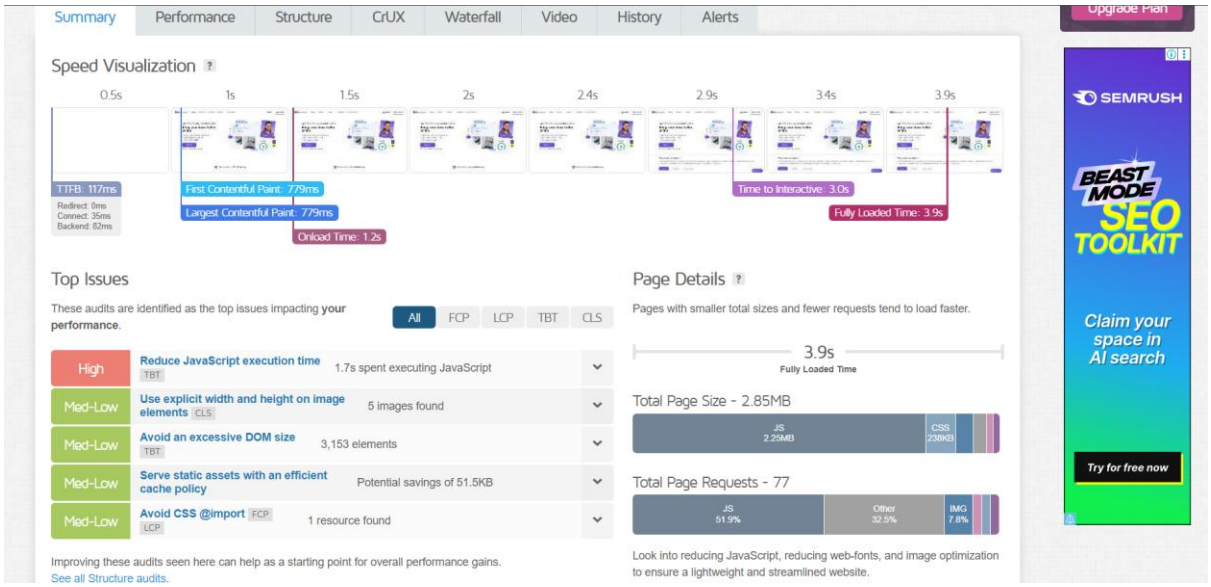


**Observation:**
The footer contains important links, contact information, social media icons, and legal pages. It is well-structured and easy to navigate on desktop.

**Problem:**
Font size is slightly small, which may affect readability. Background and text contrast is good**.**

**Suggestion:**
Increase font size slightly for better readability.

# (3) Performance Issues :



**Observation:**

The homepage fully loads in 3.9 seconds on desktop with a total page size of 2.85MB and 77 requests.

Most of the page weight comes from JavaScript (2.25MB, 51.9%) and other resources (32.5%).

Images only account for 145KB (7.8%), while CSS, HTML, and fonts are minimal.

Time to Interactive is 3.0s and First Contentful Paint is 779ms, which is decent.

**Top Performance Issues:**

1. Reduce JavaScript execution time – 1.7s spent executing JS (High impact)
2. Use explicit width and height on image elements – 5 images missing dimensions (Medium-Low)
3. Avoid an excessive DOM size – 3,153 elements (Medium-Low)
4. Serve static assets with an efficient cache policy – Potential savings of 51.5KB (Medium-Low)
5. Avoid CSS @import – 1 resource found (Medium-Low)

**Problem:**

- Heavy JavaScript execution slightly slows down page load.
- Missing image dimensions may cause layout shifts affecting user experience (CLS).
- Large DOM size can affect rendering speed.
- CSS @import and caching issues reduce performance efficiency.

**Suggestion:**

- Minify, defer, or split JavaScript to reduce execution time.
- Specify width and height for all images to prevent layout shifts.
- Optimize DOM structure and remove unnecessary elements.
- Serve static assets with proper caching headers.
- Avoid using CSS @import; link CSS directly.

# (4) SEO Issues:

## 1. Meta Title

```
<title>Hostinger - Bring Your Idea Online With a Website</title>
```

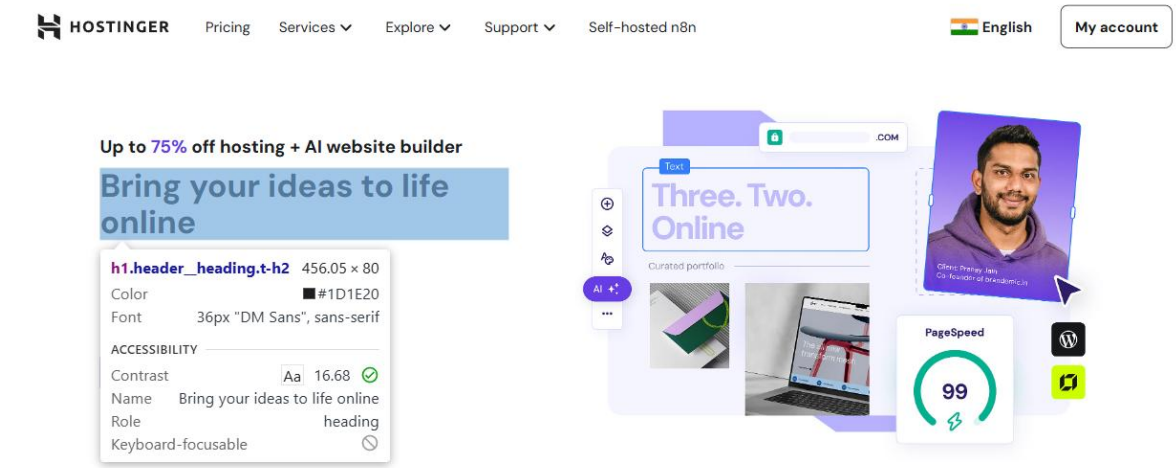
**Observation :**
The homepage title is: “Hostinger - Bring Your Idea Online With a Website”. It is clear, short, and describes the website purpose.

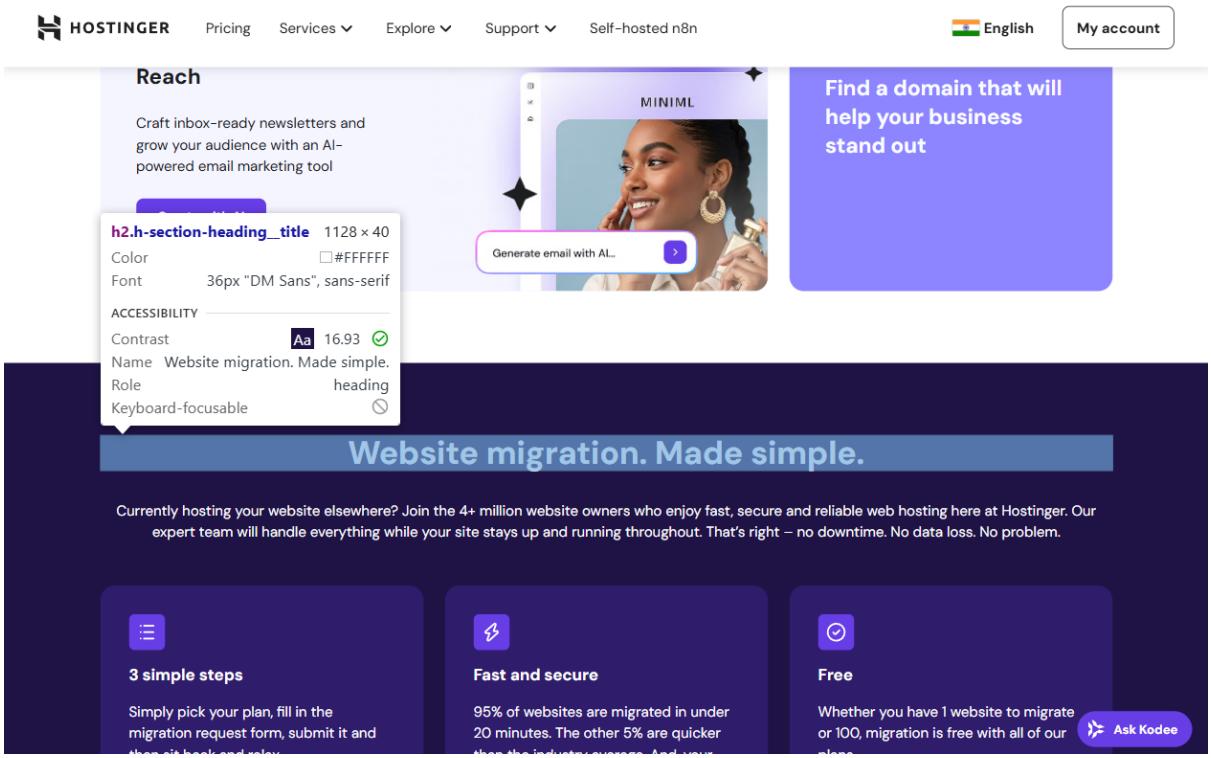
**Problem :**
Title is fine, but could include more relevant keywords for better SEO.

**Suggestion :**

- Keep the title concise.
- Include important keywords naturally

## 2. Headings





**Observation / Note:**

- Hero section has an H1 heading.
- Subheadings (H2/H3) exist in features and content sections.
- Headings are clear and readable.

**Problem / Gap:**

- Subheadings could be structured better for SEO hierarchy.
- Some headings may not include relevant keywords.

**Suggestion / Recommendation:**

- Maintain proper heading order: H1 → H2 → H3.
- Use keywords naturally in headings.
- Ensure headings are descriptive and meaningful for users and SEO.

## 3. Alt Text for Images :

```
<div class="h-image" loop data-v-5b930bd3 data-v-1a244265 data-v-5037bdd1>
  <img src="https://imagedelivery.net/LqiWLm-3MGbYHtFuUbcBtA/2d3e7607-3bf9-4153-3745-5a45ad1e3
  300/public" srcset="https://imagedelivery.net/LqiWLm-3MGbYHtFuUbcBtA/2d3e7607-3bf9-4153-3745
  -5a45ad1e3300/w=320,sharpen=1 320w, https://imagedelivery.net/LqiWLm-3MGbYHtFuUbcBtA/2d3e760
  7-3bf9-4153-3745-5a45ad1e3300/w=640,sharpen=1 640w, https://imagedelivery.net/LqiWLm-3MGbYHt
  FuUbcBtA/2d3e7607-3bf9-4153-3745-5a45ad1e3300/w=762,sharpen=1 762w, https://imagedelivery.ne
  t/LqiWLm-3MGbYHtFuUbcBtA/2d3e7607-3bf9-4153-3745-5a45ad1e3300/w=1280,sharpen=1 1280w, https:
  //imagedelivery.net/LqiWLm-3MGbYHtFuUbcBtA/2d3e7607-3bf9-4153-3745-5a45ad1e3300/w=1760,sharp
  en=1 1760w" alt="Bring your ideas to life online" loading="eager" fetchpriority="high" data-
  v-5037bdd1>
</div>
```

**Observation:**

- The hero image has descriptive alt text: “Bring your ideas to life online”.
- Alt text correctly describes the image content and purpose.

**Problem:**

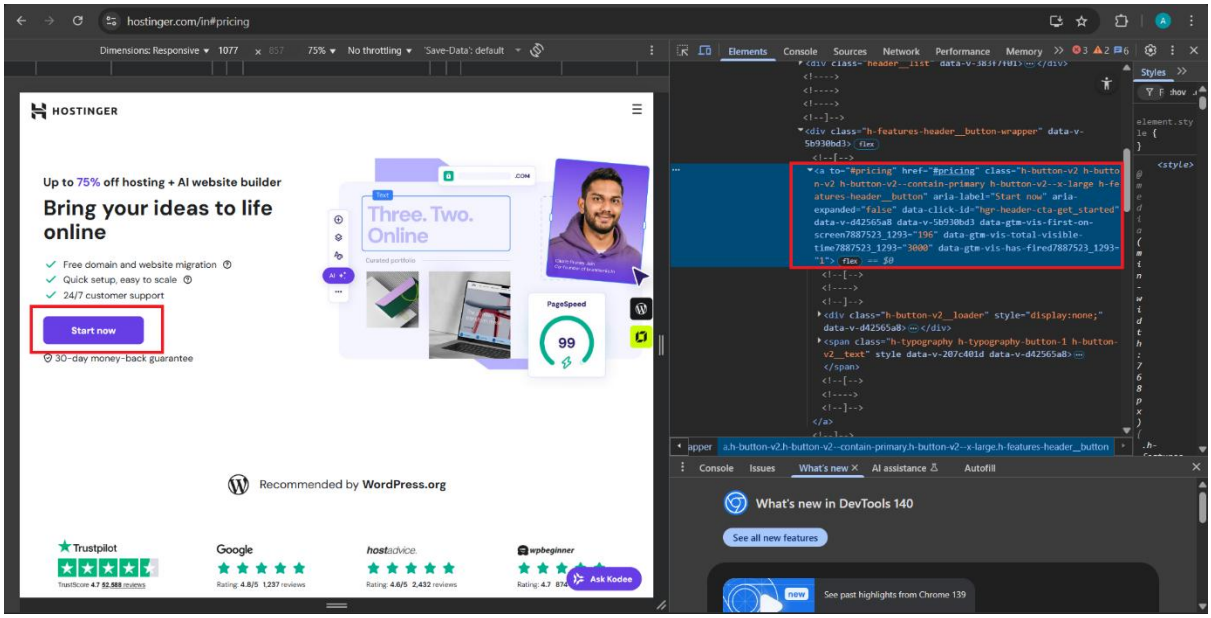
- No major issues found. Some minor decorative icons may not have alt text, which is acceptable if purely decorative.

**Suggestion:**

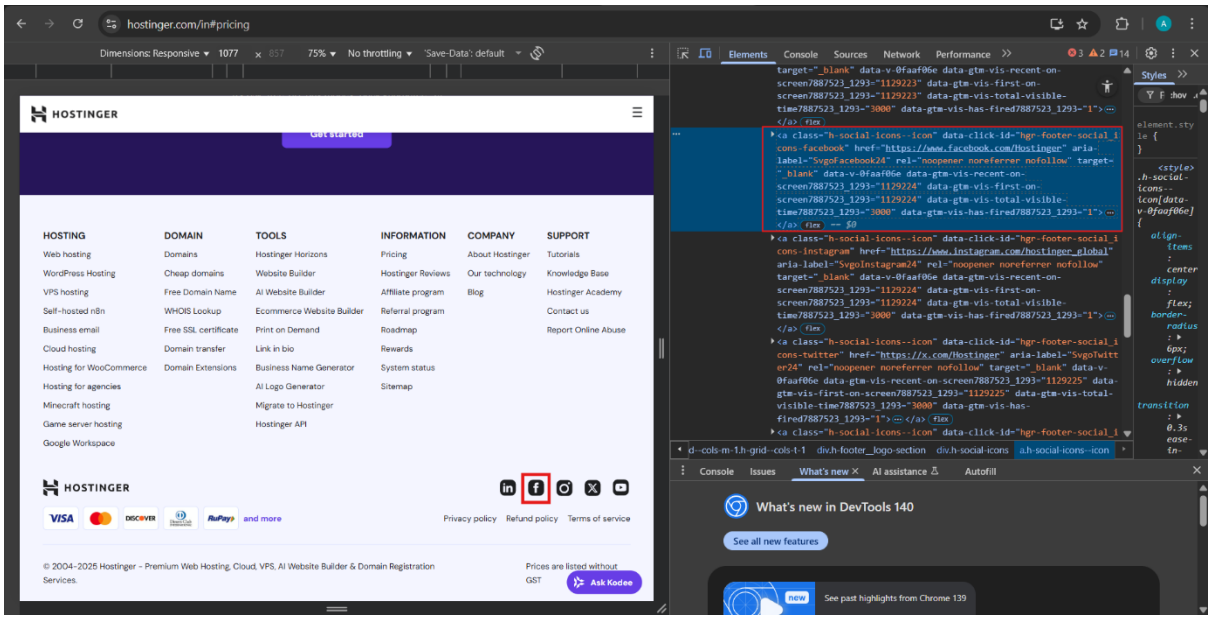
- Maintain descriptive alt text for all main images.
- For purely decorative images/icons, alt="" can be used to improve accessibility.

## 4. Internal or External Links :

## Internal Links:



## External Links:



**Observation:**

- Internal link “Start Now” button has descriptive text.
- External link (Facebook) also has accessible text/icon alt text.
-

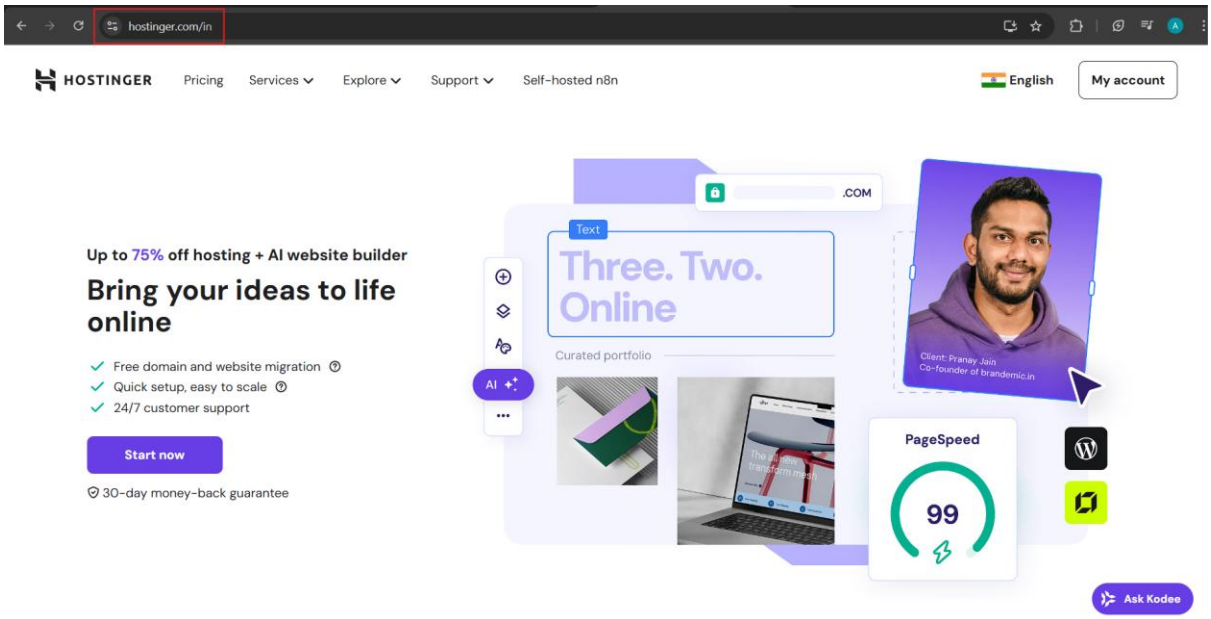
**Problem:**

- No issues found.

**Suggestion:**

- Maintain descriptive link text and alt text for accessibility and SEO

# (5) Optional Security Check :



## Observation:

- Website URL shows https://www.hostinger.com/in indicating it uses HTTPS for a secure connection.
- Padlock icon not visible in this browser view, but connection is secure.

## Problem:

- No issues found.

## Suggestion:

- Maintain SSL certificate and ensure all pages continue to use HTTPS.
- Periodically monitor security.
